

## Who We Are

In 2006 we merged our talents as a designer and developer to form the **Riddle Brothers**. Combining an eye for design with the knowledge of coding, we are able to help our clients find their presence on both the Web and printed page.

But we are more than just skilled professionals to our clients. We are teachers, mentors and friends. With **20 combined years of experience** in our fields, we have a great deal of knowledge that we are willing to share with clients and inquisitors alike.

Our image is what the “brotherly” name implies: loyalty, devotion and respect. **Customer service is a top priority** as we work from beginning to end, one-on-one with the client from the project’s conception to its completion.

As opposed to being a large corporation with tens to hundreds of developers working on many projects at one time, we are brothers specializing in the field of professional design (**Aaron Riddle**), and development (**Joshua Riddle**), that give special attention to a select few projects.

WEB DESIGN AND DEVELOPMENT, LLC

# What Can We Do For You?

Riddle Brothers Web Design and Development offers a variety of creative services that help our clients take control of their presence on the Web and further enhance their brand and visual identity to stand apart from the competition.

The list is endless of what we can provide. **Specifically, we can help you:**

## Design a Web Site

A custom original Web site design for your company or organization is the first step for making your mark on the Internet. Among the many features we can integrate into your site are contact forms, online portfolios, news feeds, member login areas and much more.

## Manage and Edit Your Web Site

A content management system (CMS) is the perfect solution if you have no experience with Web site coding. A CMS allows you to edit text and imagery on your Web site with the click of a mouse (no coding knowledge required!).

## Create a Logo and Establish Your Brand

Having your own professional logo can help your company or organization become instantly recognizable.

Handing a potential client a business card with your own mark goes the extra mile to help secure new business!

## Design a Brochure or Other Publication

Are you planning on launching a marketing campaign? Let us handle the design of your brochures, postcards, flyers and other handouts and mailings.

## Set Up an Online Store

If you are not selling your products online, then you are missing out on a majority of your potential sales. We can create an online marketplace where you can manage your products and increase your sales revenue.

## Set up a Customized Blog

Blogging is the primary mode of communication on the Web. If you are looking to start a blog (or add a custom design to an existing one), we can help.

## Create an E-Newsletter

Sending out e-mail newsletters with imagery and a custom design help them get noticed (as opposed to plain old boring text). Let us help your e-newsletter stand out in your client's e-mail inbox.

## Create a Custom Application

Having a company intranet for tracking projects, managing documents and other data is a must for larger companies. We also specialize in creating Facebook and Social Networking applications.

Visit our in-depth online portfolio featuring dozens of examples at [www.TheRiddleBrothers.com](http://www.TheRiddleBrothers.com)
